

Consultation voucher

Interested whether Fast & Fixed treatment could work for you?

The consultation and assessment process will give us an opportunity to establish the current condition of your dentition and general health, ascertain your desires and needs and give you viable options as to how your requirements can be met subject to your personal circumstances. We will carefully guide you to making the best decision based on the information given.

The consultation fee includes any necessary intra-oral x-rays. Non-discounted consultation fee is £ 120.00

Will the Fast & Fixed treatment work for me?

Dental Implantology is now part of main stream dentistry. Implant success rates are very high so the procedure is commonly used to replace missing teeth. The Fast & Fixed concept standardizes full mouth restoration making it more reliable, easily repeatable and more cost effective for you. Your dentist will be able to advise you further on all aspects of the Fast & Fixed concept and how it can work for you.

Fast & Fixed concept is based on providing you with fixed teeth in a day. You can say goodbye to your ill-fitting denture or your wobbly teeth and contact your dentist for a brand new smile!

How is the procedure carried out?

After the initial dental examination your dentist will establish whether dental implants, part of the Fast & Fixed concept, are suitable for you. In comparison with the traditional implant treatments the Fast & Fixed concept is a less invasive procedure and works with the solid structures in your jaws which are preserved even after wearing dentures for a number of years.

Prior to surgery your dentist will work with you towards the end result, your fixed teeth. You should have a very good idea of how you will look after the surgery and what the surgery will entail before you embark on the journey.

On the day of the surgery, your dentist will place four or six dental implants and after a couple of hours the teeth will be fixed over the top.
